

GREEN INTERVENTION

SchappacherWhite Architecture

WINNER

BIRDHOUSE
Shelter Island, 2016

Rhea White and Steve Schappacher made this birdhouse as a donation to a fund-raising campaign for the Peconic Land Trust. It was constructed out of recycled materials left over from one of their human-scaled projects. "Occupants have two bedrooms/ nesting areas on the upper level, a fireplace/ seed feeder, a swimming pool/bird bath, a succulent green roof, and a lower level guest house for all of their summer friends."
